

# INTRODUCING THE **MASTER RAIL** RANGE

Master Rail is a range of single piece injection moulded garment carriers designed for use in a corrugated box.

The three variants in this new range are:-  
6" Mini Rail (15cm)  
12" Maxi Rail (30cm)  
18" Master Rail (45cm)

The 18" Master Rail has been developed primarily for use in a wardrobe removals case and in a carton to ship garments produced by the clothing industry.

The two shorter rails are also suitable for both of these applications and for use with corrugated modular shelving systems.
